## Winter of Code 2017

December '17

### Mentor Manual

# What is Winter of Code?

Hello there. Feeling too old to be a student in Winter of Code? No problem, you fit in here too! WoC is about helping students make their first PR (probably) on Github, and also gaining the confidence which is required in future while doing open source.

## Goals of the Program

As a mentor, you must know that the major goal of the program is to help new students to understand the paradigm of Open Source contribution and increase the expertise level on Git and GitHub.

# Eligibility

There are 3 main criteria to be a mentor in WoC :

- You must have one or more projects on GitHub with merge access.
- Your project(s) should have more than five easy-to-fix and at least three moderate level issues.
- Your project(s) should be approved by WoC organizers.

# Why Should I Apply?

## Boost Your Project

Do you have a project which you had started months ago and now you don't find time to add new features to it or fix small issues? You must apply.

For the students it's about the contributions. And for you, it's about keeping your project alive. Do you have an idea in your mind about a small or big utility and want to make it real in December vacations? You must apply too.

You'll have to lay down the ground work and sidewise can teach a bunch of students about it too.
